Exercise
# **Dictionary**

Question_01

○ **Create a dictionary of dictionaries to store information about your students, including their name, last name, and scores in Math and English. Then answer to this questions.**

1. How many students have a score of 70 or above in both English and Math?

2. Which student has the lowest score in Math, and what is their name and last name?

3. What is the average score of all the students in the class for Math?

4. Who has the highest score in English class, and what is their name and last name?

5. How many students have a score of 90 or above in at Math?

6. What is the total score of each student for Math and English? Add this total number for each student.

7. What is the difference between the highest and lowest scores in class?
